
A
Which is the odd one out?
250 3s Social interaction videos
215 Participants
Triplet 1
Triplet 2
Triplet 20
Odd-one-out task (20 triplets x 11 sets per participant)
B
Dimension Embedding Model
1. Vector representations of video triplets
250 Videos
i
j
k
2. Proximity of each pair (dot product)
i · j
i · k
j · k
3. Choice probability for largest dot product (softmax)
p(j, k)
j · k
4. Compare to odd one out
Prediction
Human Choice
5. Backpropagation to update model weights
C
Representational Similarity Analysis
Pre-labeled Annotations
Feature RSMs
p
Learned embeddings
Model RSM
p
Similarity Probability Matrix (Human)
